WORK EXPERIENCE

Sponsor Nicholas Edwards, Auburn, AL

August 2021 – December 2021

Software Developer – ChatVUE

ChatVUE is an encryption focused application that allows for secure communication between users. Created and tested installer applications for Windows, Mac, and Linux that run shell scripting, install packages, and set up and manage dependency requirements in the .NET framework. Developed and tested UI elements for the desktop application using Avalonia UI framework and wrote extensive documentation detailing the designs and development process. Was part of Senior Design through Auburn University.

Ann Leatherwood, Mobile, AL
